HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Hoel (202) 220-6900 on February 10, 2010.

The following claims are amended;

1. (Currently Amended) A method in a terminal device, comprising:

a) establishing, by said terminal device, a first wireless communication link including control information with another device; b) establishing a second higher data rate wireless communication link with the another device, said second link operating at a higher data rate than said first link; and c) controlling communication of the second higher data rate wireless communication link, wherein the first wireless communication link frees the second higher data rate wireless communication link from link control overhead by using the first wireless communication link as a control channel for the second wireless communication link.

19. (Currently Amended) Apparatus, comprising: a) a first control circuitry; b) a first memory; c) low power communications means for communicating over a wireless low power communication link; d) data bus circuitry interconnecting a first processor, the first memory and the wireless low power communication link; and e) a detachable

memory unit connectable to the data bus circuitry through a connector interface, comprising: i) a second control circuitry; ii) an ultra wide band (UWB) receiver for receiving data over a UWB communication link, said UWB link operating at a higher data rate than said low power link; iii) a second memory for temporarily storing the received data, and iv) a circuit means connecting a second processor, the UWB receiver and the second memory together ~~and to~~ with the data bus circuitry through the connector interface, wherein the wireless low power communication link controls the UWB communication link to keep data receiving rate of the UWB communication link optimized by freeing the UWB communication link from link control overhead by using the wireless low power communication link as a control channel for the UWB communication link.

30. (Currently Amended) A method in a terminal device, comprising:
establishing, by said terminal device, a first wireless communication link including control information with another device;
establishing a second wireless communication link with the another device as a direct channel; wherein the second communication link is an ultra-wideband communication link, said second link operating at a higher data rate than said first link, and controlling communication of the second wireless communication link by using the first wireless communication link as a control channel for the second wireless communication link, whereby the first ~~low power~~ wireless communication link frees the second wireless communication link from link control overhead for direct data

transmission by using the first wireless communication link as a control channel for the second wireless communication link.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1, 14, 28 and 30 are allowed. The prior art fails to disclose establishing a second higher data rate wireless communication link with the another device, said second link operating at a higher data rate than said first link; and c) controlling communication of the second higher data rate wireless communication link, wherein the first wireless communication link frees the second higher data rate wireless communication link from link control overhead by using the first wireless communication link as a control channel for the second wireless communication link.

Claims 3, 10 and 19 are allowed. The prior art fails to disclose establishing a wireless low power communication link using link manager protocol data for exchanging ultra wide band (UWB) parameters between a mobile device and a base device having base integrated memories and a base UWB transceiver, said low power link operating at a lower data rate than said ultra-wideband (UWB) transceiver; initiating an ultra wideband transmission between the mobile device and the base device based on the exchanged UWB parameters; wherein no link manager protocol data is transmitted in the ultra wideband transmission and there is no change in the direction of a data transfer flow of a receiver side eliminating sending acknowledgements to a transmitter side.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RAJ JAIN whose telephone number is (571)272-3145. The examiner can normally be reached on M-TH.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Trost can be reached on 571-272-7872. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
